

*We're good for your business.*

# CUSTOMER FIRST. STATE OF THE ART. GOOD FOR YOUR BUSINESS.

## ABOUT US

CMG manufactures custom & stock rigid plastics packaging products such as bottles, containers, closures, cups and much more. We provide design to manufacture solutions to a wide range of industries including Food & Beverage, Healthcare and Consumer Products.

## GOOD FOR YOUR BUSINESS BECAUSE WE ARE FOCUSED ON:

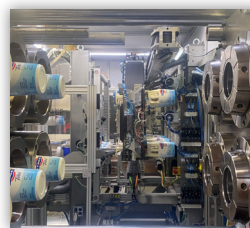

- 1 Providing you with superior customer service
- 2 Building reliability, repeatability, and sustainability into everything we do.
- 3 Keeping a tight focus on quality.
- 4 Continuous investment in new technologies, capacities, and our team members.

### INJECTION MOLDING CAPABILITIES

Capable of producing a wide variety of functional, attractive parts in an infinite array of shapes, textures and wall thicknesses in the following plastics:

- Polypropylene (PP)
- Polycarbonate (PC)
- Polyethylene (PE)
- And many more.
- Polystyrene (PS)

### IN-MOLD LABELING

In-Mold Labeling (IML) is an innovative Injection Molding process where a preprinted label is placed directly into a tool (mold) prior to injecting the plastic thereby avoiding costly and time-consuming secondary labeling and/or decorating steps.

### INJECTION STRETCH-BLOW MOLDING CAPABILITIES

One step ISBM machines producing a wide variety of bottles and jars in plastics that include:

- Polyethylene
- Polyethylene (PE)
- Terephthalate (PET)
- Polycarbonate (PC)
- Polypropylene (PP)
- And more.

### OFFSET PRINTING

CMG's decorating capabilities includes high speed dry offset printing of round products such as cups and containers in up to eight colors and at very high speeds as a cost-effective secondary decorating process.
